

Farm, Garden and Household.

Household Recipes.

CRISPER'S SIX TABLESPOONS melted butter, six tablespoons sugar, six eggs, and four eggs to roll.

SODA CAKE.—Four eggs, one pint sugar, one cup butter, one cup sweet milk, one quart flour, one teaspoonful soda, two of cream tartar.

MOUNTAIN CAKE.—One cup sugar, two eggs, half cup butter, half cup water, two of flour, two of cream tartar, half teaspoonful soda, nutmeg.

PRESERVED CHICKENS.—Pulverized charcoal sprinkled over dressed poultry, after the animal heat is expelled, will preserve it from spoiling for some time in hot weather.

CLEANING KIDS.—To clean kid gloves, take one part of cold soap and three parts of water. Mix with heat, and then stir in one part of essence of lemon. A little of this rubbed over the kid will readily remove all dirt without injuring the glove or leaving any unpleasant odor.

TA CAKE.—One cup white sugar, half a cup butter, one cup sweet milk, one egg, one-half teaspoonful soda, one of cream tartar, and four enough to make it like soft gingerbread. Flavor with the juice of a small lemon. This makes a good-sized loaf.

CORN FRITTERS.—Young, sweet corn, pepper, salt, nutmeg, butter hot in the pan. Grate the corn from the cobs into a basin, season, and drop by spoon into the pan in small portions. This is a delicious breakfast relish, but requires a considerable time to prepare.

BUTTERMILK MUFFINS.—One quart of sour buttermilk, one teaspoonful of cream, two eggs, one tablespoonful of soda, a little salt, enough to make as thick as pound cake. Bake in muffin rings placed upon tins in the oven, from twenty to thirty minutes, according to the temperature of the stove.

BREAD.—Melt the comb by boiling it in water. With cool it, and make a cake on the surface, which may be taken off and remelted. The impurities will settle to the bottom, and may be scraped off. The first melting is sufficient, remelt until it is as thick as the yellow wax of commerce.

WASHING POWDER.—Dissolve two pounds of soap in five and a half gallons of nearly boiling water, and to this add three large tablespoonfuls of ammonia, and one of turpentine. The powder can be imagined as, with half the water left to perish, as they supposed, in the desert of ice and snow, the ship drifted away helpless, until at last she brought up on the ice.

PEACH PICKLES.—Rub the down off with a coarse towel, and steam them in a steamer until they can be picked with a straw. Have ready a jar and some whole cloves, and stick four or five into each peach, and drop it into the jar. To every quart of water put one pint of white sugar and one ounce of stick cinnamon, and boil it altogether half an hour, then pour it on the hot peaches, and you will have some excellent pickles.

BAKED FRESH FISH.—Bake like meat in a pan with salt and a little water, and when partly cooked pour over it half or a whole cup of cream, according to the quantity of fish. It will bake in about an hour, and the thickened cream should be made in the pan. Cut halibut in thick slices, but other kinds like haddock, cod, etc., are best cut in small pieces, and may be stuffed, if desired. This is a nice way of cooking, if one cannot eat fish fried, as it preserves the flavor much better than boiling.

LEMON PRES.—Take two lemons; grate the peel of each in a mortar, and mix together; then squeeze in the juice of the lemon; add four tablespoonfuls of cream (where cream cannot be got, two tablespoonfuls of butter and three of water will answer); have ready the dish under crust and pour in the mixture; bake until done. While baking, keep any sugar, and four eggs, add four tablespoonfuls of white sugar; spread the icing over the top and bake until the frosting is cooked, but not burned.

Fall Work.—It is not improbable that most farmers know as much about the fall as they do about the spring. It is not therefore because of a surplus of egotism that we offer suggestions, but because there are some farmers who seem to forget how much may be done during the coming two months to advance the next season's work. Draining of lands that are overflooded in late fall or early spring can be done during the fall, and now, and all ploughing and subsoiling should be done the present month. Cleaning meadow lands of stone and other obstructions to the mow can be better done in the fall than in the spring. The laying of pipe with the view to secure water supply in the stables is often delayed until frost comes, instead of being attended to in the summer, when it can be done with less danger from freezing. The clearing up and burning of brush heaps and old debris should be attended to. It is an excellent month to go through the woods, gathering up and haul to the woodshed chips, dried twigs that will burn like powder, and dried, half-decayed wood, which will burn as well as the fresh, before the fall rains come, and will be consumers a vast amount of better timber for fuel. The ice-house should be built this month. There is no reason why September and October should not be made the busiest and most profitable preparatory months in the year. Wise farmers make them so. These are only suggestions.

Co-operative Stores.—A correspondent of the *Rural New Yorker* says: "I notice, in speaking of co-operative stores failing of satisfactory success, you say you do not know of a single instance of success in the Eastern States, and say you would be glad to hear of any case in which it was successful. I think I can point to one, the business was started in the town of Junius, Seneca county, N. Y., in 1853, on the principle above mentioned. The association was commenced with a capital of \$8,000, and in previous to commencing operations. It was carried on for six years and then closed up. In the six years it paid 10 per cent dividend on its capital, and closed by paying back its capital and 30 per cent additional.

Commenced again immediately with same amount of capital, and continued for three years, and finally closed, and was sold to other parties, and the business closed entirely as far as co-operation was concerned. It continued to pay the 10 per cent on capital stock for the next three years, and finally closed by paying capital and 30 per cent to all stockholders. Now this was satisfactory to the investors and would have been continued had the business changed hands and deprived them of their place of business.

This is a country place, surrounded by thirty villages, it being not more than ten miles from Seneca Falls, Geneva, Waterloo, Phelps, Lyons, and Clyde, and is considered well hemmed in for purposes of trade, and a sharp competition on all sides, with the advantages of railroads and canals to help them; but we did succeed notwithstanding.

A pretty Chinese girl is now undergoing trial at Pekin, charged with being the captain of a piratical craft recently blown up in one of the Chinese rivers.

The Polaris Castaways.

Story of the Budding Party—The Separation from Tyson—The Abandonment of the Island—Putting to Sea in the Boat—The Rescue.

The whaling steamer *Arcturion*, Captain Adams, arrived at Dundee, Scotland, from Davis Straits, having on board the men of the *Polaris* expedition, who were picked up by the whaler *Havens* on the 20th of July.

The men are all well and show no marks of the ice such as might have been expected after their terrible experiences. The following narrative of the incidents that occurred after the separation of the crew is gathered from the party:

The *Polaris* had been leaving badly before the 15th of October, 1872, and the situation, although not alarming, was such as to demand attention. The determination to leave the ship was arrived at on the 15th of October, at which time they were in 70 degrees.

Some of the crew remained aboard, while others landed on the ice, and they began to get out stores, with the intention of making everything they could need for a long sojourn in those frozen regions. Between 10 and 12 o'clock at night, while this work was proceeding, a very severe gale sprang up, and the snow began to blow, with strong but variable winds. Operations, however, were continued, and after untiring efforts the boats were got out, and the men began to make their visions taken out. Suddenly the hawsers by which the ship was made fast to the ice gave way, one snapping, the other tearing its anchor from its lodgment. The whole party were thrown into a large piece from the floor with three men upon it, and as the *Polaris* drove upon the ice, the boats were separated.

"What are we to do?" Captain Buddington shouted back that he could do nothing for them; they had boats and provisions, and must shift for themselves. The men were thrown into a large piece from the floor with three men upon it, and as the *Polaris* drove upon the ice, the boats were separated.

"What are we to do?" Captain Buddington shouted back that he could do nothing for them; they had boats and provisions, and must shift for themselves. The men were thrown into a large piece from the floor with three men upon it, and as the *Polaris* drove upon the ice, the boats were separated.

"What are we to do?" Captain Buddington shouted back that he could do nothing for them; they had boats and provisions, and must shift for themselves. The men were thrown into a large piece from the floor with three men upon it, and as the *Polaris* drove upon the ice, the boats were separated.

The Assassination of Gen. MeCook.

There was a meeting of the citizens of Yakutat at the court-room to consider what action should be taken regarding the murder of Gen. MeCook.

The life was rough, laborious and monotonous; but though dangers occasionally presented themselves, well calculated to inspire the greatest fear, the serious accident occurred, and on the 21st of June the boats reached Cape York in safety. Here they were again closed, and the men were again separated. The 23rd their troubles came to an end. A whaler was despatched a few miles off, and the whole party was at sea in a turmoil of excitement. A great fear of the management of the boat, and the men were again separated. UTICA STEAM ENGINE CO.

(FORMERLY WOOD & MANN.)
STATIONARY & PORTABLE
Steam Engines
 The Best & Most Complete Assortment
 in the Market.
 These Engines have always maintained the very
 highest standard of excellence. We make

manufacture of Engines, Hoilers and Saw Mill machinery. We have the largest and most complete works in the country, with machinery specially adapted to the work.

We keep constantly in process large numbers of Engines, which we furnish at the very lowest price and on the shortest notice. We build Engines specially adapted to Mines, Saw Mills, Grist Mills, Cotton Gins, Thrashers and all classes of manufacturing.

We are now building the celebrated Lane Circular Saw Mill, the best and most complete saw ever invented.

We make the manufacture of Saw Mill outfitting a specialty of our business, and can furnish complete on the shortest notice.

Our aim in all cases is to furnish the best and

Ministry in the market, and work absolutely
qualified for beauty of design, economy and strength.

Items of Interest.
We are always looking into the future, but we see only the past.
The President has appointed November 27 to be Thanksgiving Day.
In consequence of the panic the Mississippi State Fair is postponed to November.
The importation of American oysters to England was not successful as a rule.
Most men like to see themselves in mirrors. Ladies like to see themselves in prints and velvet.
The "Grand Cavalcade" at the Frier in Brantford, Conn., was composed, in part of 76 yoke of oxen.
According to the revised list of the assessors there are 16,870 male qualified voters in Philadelphia.
One of the nearest things ever given

Woman, the last word on our lips, because it comes from the bottom of our hearts."

The Commune, during their possession, was destroyed, among other things all the official records of births and marriages.

Every year a number of soldiers are killed by falling from the celebrated castle in Edinburgh while attempting to climb it.

Copious showers of manna are remembered in Hill County, Texas. It resembled gum, and had all the sweetness and flavor of honey.

An ignorant Indiana farmer tied a goose on the roof of his barn and left it there for several days. He believed that so long as any part of the bird remained the farm will be safe from lightning.

Mr. James Wilson and his wife Barbara of Madison within three hours of each other. He is fifty-four years old, and his wife eighty-three, and they were the first settlers in Mercer, Wankasha county.

A Calcutta dispatch of Sept. 28 says more men have been killed by the Indians in the New York Territory than in any other. The Government have at length ordered the magistrates to prevent danger of life from these Jujuveng carns.

A large cargo of slaves on their way to Malunga, Madagascar, have been captured by the New York coast-guard. A proof has been found that a large slave dragoon is carried on almost under the name of the Mozambique fort.

John T. Irving says that he cannot be convicted of the burglaries for which he is charged, because the New York police agree with him, that opinion.

There is something very strange about the way the detectives have acted in the Nathan case.

It is sometimes very annoying to have one's private winter information upon subjects in regard to which their ignorance is remarkable; but that man was simply aggravating who said that Pennsylvania was so called because the lead pencil was made there.

At the recent county fair in Westmoreland, Penn., a gentleman of unimpeachable patriotism but of limited geographical information, entered for a premium a picture of Patrick Henry. The picture was celebrated speech before the House of Burgesses of *West Virginia*.

The wreck of the vessel Royal Charter, lying on the Angelsea coast, was named after the Angelsea coast was named Williams. He went down to the

reck in a diving suit for the purpose blasting. The powder exploded prematurely, and Williams was hauled up dead.

The premiums offered at the Rome, N. C., fair for the most efficient cook among girls of the district, gave rise to more lively competition than any other premium offered. There is a lady individual in the district who has never wins a premium will get a husband before the year is out.

A wife asked her husband for a new seal. He replied: "Times are hard, and seals—so hard—can hardly keep their heads above water." The woman retorted: "You can keep your nose above water easy enough, if you have mind to; but the trouble is, that you keep it too much above brandy."

One ought to let me pass here free

ture of my profession," said a physician to a tollgate keeper. "Not so," said the reply, "you send too many dead heads through here now. The toll I did not take at that point, but I paid his toll and passed on."

Ancient Pilgrim—Ah, fair sir, all is changed since my time. No pebbles in it shows now—no toll, no robbery, no danger—everything made easy; in fact, it is the only safe place to go. Ancient Pilgrim—No robbery? No danger!—And it occurs to you, my venerable friend, that our pilgrimages are made easier?

And?

The party of the Polaris have several of the records of the lost ship. The secretary of the U. S. Navy in conversation said he did not credit the reports, which have recently been renewed, that Capt. Hall's death was the result of

present at the former investigation are convinced that the command-
er's officer's death was from natural
causes alone.

English naval officers are, when on
foreign stations, in the habit of per-
forming marriage ceremonies, there be-
ing no Consul or Chaplain in the neigh-
borhood, on board their vessel. The
other officers were not known have just
learned that such marriage is not valid,
and in consequence the Commissioners
the Admiralty have directed that no
commanding officer shall in future sol-
emnize a marriage.

At the Winchester, (W. V.) fair, Mr.
D. Long's sorrel filly won the run-
ning race and took the premiums. Mr.
J. F. Sower's three year old colt
and his skin won the trotting race. At
the same fair, Mr. W. Updegraff, of
Cumberland, Md., was shown

his horse and fatally injured. The
he shield the track, jumped the
se, pitched him over head foremost
the type of accident that occurs
posite side, breaking all his left ribs.
Long is the second rider whose horse
rckaway has killed within a year.

Chicago is an extravagant place. Just
the fact that there are no less than 400
table in the city is a fact that is
average of \$12 a day each, or \$4,800
year, or \$28,800 a week. Each game
billiards will average, in addition to
cost of the game, an equal sum for
and as much for criers, making the
weekly expenditure of wages, earn-
ing, and profits of \$86,400. There are
0 saloons in the city, the average
riple of which is less than \$60
a week, expenditure of \$180,000
Over \$200,000 a week in these in-
ferences!

THE BOOT TRADE.—In this vicinity is becoming very quiet, although stocks in hand are unusually light. A feeling of uncertainty in relation to the future value of stocks leads to some hesitancy in filling orders, but it is believed that a short supply of goods will soon call for more active operations, and the pecuniary results to be the case, the seems to be no reasonable ground of apprehension of a shrinkage in values. It is generally conceded that the present pinch in financial affairs is the result of a want of confidence, and when money men recover from their "scare," the wheels of business will again revolve briskly and prosperously.

THE VESPA EXHIBITION.—The narrative of the principal features of the great exposition at Vienna, given by Miss R. A. Faxon, at the Union Church, last Friday evening, was an attractive and interesting entertainment to the large number of attendants, and the pecuniary results were very satisfactory, about \$25 being received at the door.

ELECTION CASE.—We are indebted to Mr. Perry, driver for the South Weymouth Bakery, for a supply of clean cake from that establishment. Its lightness and fineness proves that the Howes are not to be beat in their line of trade.

PROSPEROUS.—An invoice of \$300 worth of bottles received by R. W. Walcott, perfumer, of Weymouth, last week, indicates an activity in his new enterprise commensurate with his efforts to furnish a superior quality of perfumes. An order for \$500 worth received by him from New York, this week, could not be filled, owing to the number of previous orders.

INHALER.—Mrs. Tuck, of the Invalid's Retreat, South Weymouth, is meeting with good success in the use of the Inhaler which she advertises in our columns. The instrument is very convenient in application, and as the inhalation is in the form of dry vapor, the complex and straining effects of liquid inhalations are entirely obviated. Mrs. Tuck will dispose of family rights at low rates, and we commend to our readers an examination of the Inhaler, which can be seen by calling at the Retreat, or at her office in Boston.

THE NORTH WEYMOUTH MUSICAL SOCIETY.—The first rehearsal of the season on Monday evening, in the vestry of the Unitarian Church, under the able direction of W. Bartlett, Esq., Committee, Alden Vining, Noble Moore, Ansel Burdick, Secretary and Treasurer, T. F. Cleverly. The society have taken up the study of music, and will no doubt give several popular concerts during the winter.

IN THE HARNES.—Wm. P. Pratt, Esq., formerly of Weymouth, has engaged in the publication of the "Virginia (Nevada) Evening Chronicle," published every evening by the firm of Stevenson & Pratt.

DECEASED.—Gen. Henry Dunham, of Abington, well known to many of our readers as a General in the M. V. M. in years past, died in that place on the 18th inst., aged 67 years.

COUNTY CONVENTIONS.—Both the Republican and Democratic conventions for Norfolk County, nominated John H. Burdick as candidate for the office of Register of Deeds, his long service under Mr. Ford being considered an especial recommendation in the nomination. In the Republican Convention, Mr. Burdick, 40, and on motion of Hon. F. A. Holbart Mr. Burdick's nomination was made unanimous. C. C. Churchill, Esq., was nominated for County Treasurer by acclamation. Rev. C. H. Rowe, Weymouth, Deacon, 39; F. W. Smith, Esq., Boston, Jan. 18. These lectures are to be of the usual character given before literary associations. The Committee have been fortunate in securing good speakers for the course, and the lectures will be instructive and interesting. The price of session tickets is \$1, thus for a small sum giving a fine series of intellectual entertainments.

SOUTH WEYMOUTH LYCEUM.—The fourth lecture in this popular course was delivered on Tuesday evening, by Rev. Mr. Murray, of Park St. Church. With-out attempting to describe the lecture, a synopsis of which has already been published in the daily papers, it is sufficient to say that the lecturer treated his subject, "Civilized Heathen," in a masterly manner, and was listened to with large and appreciative audience. He demonstrated that the heathenism of Japan and the great empire of China was at least entitled to be considered as civilized, heathenism, and showed by his analysis of the religious, political, and social conditions of the country, that the habits and manners and customs of the three hundred millions of people whose religion is the religion of Buddha, are in many respects worthy of comparison with those who profess the doctrines of Christ.

The lecture of Dr. Dio Lewis, the previous week, was a treat which was highly enjoyed by those who had the courage to face the storm which prevailed on that occasion.

The next lecture will be given by Dr. L. I. Hayes, the Arctic explorer, on Monday evening, Nov. 3. Dr. Hayes is widely known by his discovery of the open polar sea, and extending his explorations to within 435 miles of the North Pole, the most northerly region ever attained by any explorer. His account of Arctic adventures is intensely interesting, and with his vast knowledge of the subject, he captivates equally the old and the young, the illiterate and the learned, while the photographic illustrations which accompany the lecture by their beauty and truthfulness to nature constitute an entertainment as attractive as it is instructive.

THE FIREMEN.—A petition has been drawn up in the East Braintree District, for a meeting to see if the District will dispose of the Union engine, and the hose and other apparatus, and also the engine house, the trial of engines for protection against fire in the Union and Park districts of Braintree, where a Fire District was formed last year, and was quashed by a motion at the meeting last Wednesday evening, to reconsider the whole matter, which was voted, and the meeting dissolved. The attendance was large, and the vote indicates that the majority of the residents of the Districts are of the opinion of one of the speakers at the first meeting, that fire engines are a worse evil than "taking the plague in the natural way."

A rumor has been circulated that Henry Hall, the rubber dealer of Boston, has offered a prize of \$50 for the testing of his patent hose, the trial of engines take place at Braintree. We do not vouch for the truth of the rumor.

Braintrance.

BRAINTREE CITIZENS CLUB.—Mr. Editor:—Notwithstanding the storm and the number of spectators was more than trebled. The meeting was called to order by Vice President Holbrook, and after the reading of the minutes, the President Mr. Joseph Shaw was elected to fill that position. After the usual routine of business had been transacted, the question of the evening was taken up for debate—Resolved, "That Gov. Washburn ought not to be re-elected Governor of Massachusetts." The debate was opened by Mr. Washburn.

MR. DRINKWATER.—The first person Mr. Washburn ought not again to be Governor, is that he is a Republican, and no Republican deserves to be Governor of Massachusetts. The second reason, he is a backslider. We are at present condemning Congressmen of all parties for taking back pay. In 1866 Mr. Washburn, when a member of Congress, did not vote for and by his presence at the meeting of the Club was a bill of that date, did certainly take advantage of it and pocket his share of the ill-gotten money. The issue in the coming election in this town is the temperance question. They tell us that Mr. Washburn is in favor of prohibition. Last year he prayed to God that his arm might be lengthened; but he wants back-bone enough to be a temperance man. Boston is an example of his efficiency in enforcing the law. Three thousand rum shops in the city, and Police Commissioner Bates cannot cross the city with his official car, passing a hundred. There is no hope that Mr. Washburn will do any better than he has done, while Mr. Gaston, his opponent, is every way fitted to be a better man. The action of the Legislature that will enforce temperance principles better than the present partially enforced statute.

MR. DICKERSON.—He should vote for Gov. Washburn, a moral, upright, Christian man, and we may believe that when the fountain is pure, the stream will be also. In his past services he has proved himself to be the right man in the right place. He honored himself and honored the State, and since elected Governor he has saved the citizens many dollars by vetoing a single railroad bill. And then again, Mr. Washburn is an out and out prohibitionist. But people ask why he did not enforce the law in Boston? Why did not Mr. Gaston enforce it when Mayor? The Democratic party did not then want to enforce the law, and the great money influence of Boston today, makes it impossible for the Republicans to enforce it. The law is excellent for Braintree, but almost a failure in Boston.

MR. DRINKWATER.—He replied to the last speaker, saying that when the people wanted to enforce the law, they would then would not use the political party that ever attempts to do it will cease to exist. The Democratic party is not dependent upon any prohibitory law for success.

MR. HOLBROOK.—He had been looking with great interest at recent political movements, but his faith was shaken in the powers that rule, and it would not be right, under the circumstances, to favor the re-election of Mr. Washburn. Have in times past acted wholly with the Republican party, believing it to be a party seeking the good of the whole country, but lately, as a party, they have been guided by the selfish interests of the few, and have made smooth speeches and fair promises, but having obtained power have forgotten their duty to the people.

INSTALLATION OF REV. F. P. CHAPIN.—Pursuant to letter missive from the 1st Church in Weymouth, an Ecclesiastical Council assembled in their meeting-house on Wednesday, Oct. 22. Rev. S. L. Rockwood called the council to order, and A. M. to read the letter-missive. Rev. S. H. Hayes was chosen Moderator, and Rev. Geo. F. Stanton, Secretary. After prayer by the Moderator, the following officers were elected to represent the council.

Salem and Marine's Church, Boston, Rev. S. H. Hayes, Pastor, Bro. H. Houghton, Deacon.
Church in Randolph, Rev. J. C. Labaree, Pastor, Dr. E. Alden, Deacon.
Church in Cohasset, Rev. M. A. Stevens, Pastor, Bro. Nichols, Town, Deacon.
1st Church, Abington, Rev. Geo. E. Freeman, Dea. J. L. Nash, Deacon.
North Abington, Dea. James Ford, Deacon.
Braintree, Dea. Elias Hayward, Deacon.

Hingham, Rev. Austin S. Garver, Pastor, C. S. P. M., Deacon.
2d Church, South Weymouth, Rev. Geo. F. Stanton, Pastor, Dea. Jacob Lund, Deacon.
Union Church, Weymouth Landing, Dea. S. W. Nash, Deacon.

Union Church, South Weymouth, Rev. James McLean, Pastor, Dea. John S. Cobb, Deacon.
Church in East Weymouth, Rev. E. P. McElroy, Pastor, Dea. Alvah Raymond, Deacon.
Pilgrim Church, North Weymouth, Rev. L. B. Voorhees, Pastor, Dea. David Pratt, Deacon.

Church at Lovell's Corner, Dea. Asa Whitman, Deacon.
Church in Quincy, Rev. Edward Norr, Acting Pastor, Dea. E. Clapp, Deacon.
Rev. S. J. Jones, Perkins, of Braintree, Rev. S. L. Rockwood, of N. Weymouth, and Prof. W. S. Tyler, D. D. of Amherst College.

MR. DRINKWATER.—He presented the Council listened to the letters of Rev. Joshua Emery, pastor of the church, requesting a resolution of the active duties of his office, and afterwards requesting a complete dissolution of his pastoral relation with the Church and Society. The action of the Church and Society upon these communications was presented by the respective members of the Council, and the resolution was adopted. The action of the Church and Society upon these communications was presented by the respective members of the Council, and the resolution was adopted.

WORKING MEN, AWAKE.

The time has come when workingmen should be aroused to a sense of duty. We should demand that the laws which will be the interest of the laboring classes. Laws are generally made for the special benefit of corporations and capitalists, because the laboring classes of the country have not moral courage to raise their voices against them. We are to be called upon on Tuesday next to deposit our votes for men who are to compose the next Legislature, and now what shall we do? Shall we cast our votes again for deceitful crafty politicians, who always promise to do great things for the best interest of the laboring class, but as soon as elected to office are ready to sell out to political rings, railroad monopolies, and capitalists generally, forgetting the fair promises which they had made to those who have to earn their bread by the sweat of their brow. We believe, yes we know that men can be selected from the ranks of the working classes in every town in the State who are educated, trustworthy, reliable men, and who will be the interest of the laboring classes. We are to be called upon on Tuesday next to deposit our votes for men who are to compose the next Legislature, and now what shall we do? Shall we cast our votes again for deceitful crafty politicians, who always promise to do great things for the best interest of the laboring class, but as soon as elected to office are ready to sell out to political rings, railroad monopolies, and capitalists generally, forgetting the fair promises which they had made to those who have to earn their bread by the sweat of their brow. We believe, yes we know that men can be selected from the ranks of the working classes in every town in the State who are educated, trustworthy, reliable men, and who will be the interest of the laboring classes. We are to be called upon on Tuesday next to deposit our votes for men who are to compose the next Legislature, and now what shall we do? Shall we cast our votes again for deceitful crafty politicians, who always promise to do great things for the best interest of the laboring class, but as soon as elected to office are ready to sell out to political rings, railroad monopolies, and capitalists generally, forgetting the fair promises which they had made to those who have to earn their bread by the sweat of their brow. We believe, yes we know that men can be selected from the ranks of the working classes in every town in the State who are educated, trustworthy, reliable men, and who will be the interest of the laboring classes.
